BeSafe[®]

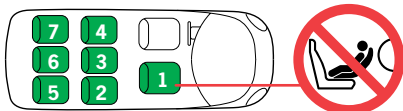

Approved cars for iZi Kid provided that the car is equipped with a 3-point belt

The iZi Kid is a semi-universal child restraint system. It is approved to regulation 44.04 series of amendments for general use in vehicles fitted with 3-point belts approved to UN/ECE Regulation No. 16 or other equivalent standards.

The iZi Kid is suitable for fixing into the seat positions of the cars listed below, providing approved 3-point belt is fitted and available. Seat positions in other cars may also be suitable to accept this child restraint, however we have not yet tested that combination of car and iZi Kid seat. If in doubt, consult either BeSafe or the retailer. For updated car list see: www.besafe.eu

When the support leg is positioned on a storage compartment in front of the car seat, this compartment has to be filled up in such a way that the cover can hold the forces of the support leg. Consult the car dealer. When the floor under the floor support is insufficient to hold the forces you can not use the iZi Kid in this position of the car.

! DO NOT use on a passenger seat fitted with activated frontal air bag.
